

Informed Consent For Intravitreal Eylea Injection Procedure								
Patient Name	:	Alston Rebello		Emirates ID	:	784-1991-2906159-3		
File No	:	17	DOB	:	1996-06-20	Nationality	:	Indian
Gender	:	Male	Doctor's Name	:	Alan Alfred	Date	:	2025-02-21

I, the undersignee Alston Rebello with file number 17, acknowledge that I have been informed with the following:

- The goal of the treatment is to prevent further loss of vision. Although many patients have regained vision, the medication may not restore vision that has been lost and may not ultimately prevent further loss of vision
- Possible complications and side effects of the procedure include but are not limited to retinal detachment and bleeding. There is also a possibility of an eye infection (Endophthalmitis).
- As with all types of surgeries, there is a possibility of complications due to anesthesia, drug reaction, or others.

The above explanation has been read by/to me. The nature of my eye condition has been fully explained and the proposed treatment has been discussed. The risks, benefits, alternatives, and limitations of the treatment have been discussed with me. All my questions have been answered

Hereby, I authorize my Doctor to administer Intravitreal Eylea Injection in my eye/s under local anesthesia at regular intervals as needed:
