

Intimate Peel Informed Consent

Patient Name	:	aamie may			Emirates ID	:	784-1991-1236544-5	
File No	:	7000282	DOB	:	2023-05-30	Nationality	:	Singapore
Gender	:	Female	Doctor's Name	:	Doctor-9 test	Date	:	2023-11-17

I have been informed and well explained about the following details of the treatment:

- Intimate peel is a non-toxic acidic chemical that, when applied to the affected area, stimulates the top layers of the skin to peel and rejuvenates the underlying skin. This results in a lightening of the treated skin.
- The product that will be applied are packed with proven active ingredients to lighten the skin on your intimate areas. Usually a course of 4 treatments would be recommended, spaced 1 – 2 weeks apart
- The Intimate Peel will then be applied to the area and left to work for 5-8 minutes each coating. The Therapist will then thoroughly remove the product leaving you feeling completely clean and fresh.
- The Intimate Peel doesn't require any post-treatment downtime. You will be advised to wear loose clothing, avoid exercise directly on the same day of your treatment as well as avoid any waxing or laser hair removal on the area during the treatment process.

I am consenting the Therapist/Doctor Doctor-2 to do my Intimate peel at VISION MEDICAL & DENTAL CENTER (Abu Dhabi). I am fully aware that the main priority of VISION MEDICAL & DENTAL CENTER (Abu Dhabi) staff is to ensure my safety, make me feel at ease and maintain my privacy and comfort at all times.
