Gender	:	Female	Doctor's Name	:	Shilpa Sandhya	Date	:	2023-12-27

INSTRUCTIONS

This is an informed consent document that has been prepared to help inform you concerning Botox injections, its risks, alternatives treatments(s).

It is important that you read this information carefully and completely. Please initial each page, indicating that you have read the page and sign the consent.

INTRODUCTION

BOTOX injections involve a series of small injections in order to weaken the chosen muscles for example on the brow or below the eyes. Weakening of the injected muscles begins to be apparent after 2-3 days with the peak effect being reached after 7 days. Results can last 3-6 months. The procedure can be repeated after 3 months; however, injections given less than 3 month intervals may reduce the efficacy of the injections.

ALTERNATIVE TREATMENTS

Alternative forms of non-surgical and surgical management for the appearance of wrinkles and lines in the skin consist of Collagen treatment, laser brasion, and brow lift. Risks and potential complications are associated with alternative forms of treatment
